Re: 167-11496-00001
First Administrative Amendment to
Part 70 167-5988-00001

Dear Mr. Koszewski:

Alcan Rolled Products was issued a permit on June 30, 1999 for stationary source which consists of production equipment to reduce aluminum rolls into finished foil products. A letter requesting an air sparging/soil vapor extraction (SVE) system for a site remediation project was received on November 3, 1999. Pursuant to the provisions of 2-7-11 the permit is hereby administratively amended as follows:

The addition of the air sparging/soil extraction system is needed in order to be in compliance with the Indiana Department of Environmental Management's (IDEM) Voluntary Remediation Program. Alcan Rolled Products determined the SVE system would be the most suitable option for a site remediation project. Potential emissions from the SVE system are at an Insignificant Activity level.

All other conditions of the permit shall remain unchanged and in effect. Please attach a copy of this amendment and the following revised permit pages to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Mr. Darren Woodward, at (812) 462-3433 extension 15.

Sincerely,

George M. Needham
Director
Vigo County Air Pollution Control
